

# Lab Spaces That Work In Practice

CALL US ON **01527 834798** TO DISCUSS YOUR PROJECT OR TO BOOK A SITE CONSULTATION WITH OUR EXPERTS

Since our inception in 1999, John Knight Interiors have been fitting-out smart laboratories, with a focus on creating spaces that work well for the end user. To achieve this we spend time with you finding out your needs and priorities. Our specialised interior designers then convert your brief into CAD room drawings, for your comments and suggestions. Once drawings have been approved, our production team get to work and turn your bright ideas into a stunning reality! Experienced lab fitters are used for the installation, who take pride in fitting your room out to a high standard.

### **We provide a full science lab installation service including:**

- Free design consultancy
- Bespoke manufacturing facility
- Diligent fitters who care
- Post-installation customer care

## **BREATHE MORE LIFE INTO YOUR SCIENCE LESSONS**

**Project Focus - Ellowes Hall Sports College**

**MAXIMISE  
YOUR LAB  
SPACE,  
WITH  
FUSION2**

Study desks from one side...

**Meet the FUSION2 System**

The answer to the evolving needs of our clients. By situating services away from the students on a sloping service panel, FUSION2 promotes higher focus and ultimately higher learning outcomes for pupils.

A more flexible design than traditional Octagons and Perimeter Storage laboratory layouts, FUSION2 combines practical experimentation areas with study desks for theory work. You can fit 32 students and a separate demo desk for the teacher into just 60 square meters, compared with 90 square meters required for a traditional laboratory layout. In some cases schools have been able to fit a lab into a standard classroom, avoiding costly new build or re-modelling works.

Practical science tables on the other!

'Ellowes Hall Sports College are very pleased with both the style and quality of John Knight Interiors science specific furniture. The reverse sided gas taps and electric points were a key to reduce the risk of accidental or deliberate tapering. This will also increase the longevity of the furniture. The new layout of our classrooms, with fitted benches, has improved both the quality of teaching and learning as well as, more importantly, improved student safety. Our teacher can easily see all students and all our students can easily see the teacher, which is particularly important during practical.'

**Project Lead | Ellowes Hall Sports College**

**Why FUSION2?**

- Cut lab space by up to 33%
- Improved visibility & pupil safety
- Services off desktops
- Increased pupil focus & results

**The end result – a smart laboratory where people want to be!**

## OUR LABORATORY DESIGN TEAM

Our specialist in-house designers have over 50 years of combined experience in creating beautiful labs, with an emphasis on practical, user-friendly layouts.

Call our office on **01527 834798** for a **free consultation**.

**Alan James, Senior Lab Planner**
